**Abstract**— This study aimed to show the students satisfaction towards the educational website component formats. The sampling group used in this study consisted of 600 students, 1st and 2nd year higher vocational certificate. They are from 15 colleges under the Vocational Education Commission, Bangkok Region 1. Tools were educational website models and questionnaires. The educational website models were determined to website component format arrangements, background colors, font formats, font sizes and illustration arrangement. Statistics used in data analysis were percentages (%), mean ( $\bar{X}$ ), S.D., t-test and F-test.

Results revealed that the students were satisfied with the educational website component format arrangement. That was to say the 2nd format, which placed a menu on the left, and the right sides, had white as a background color, and typed MS Sans Serif font in a 16 inch-size. Also, the students were satisfied with the illustration arrangement on the left side of the statements.

**Keywords**— Educational Website, Satisfaction, Website Component
